

AMENDMENTS TO THE SPECIFICATION

In the Specification

Please substitute the following amended paragraph(s) and/or section(s) (deleted matter is shown by strikethrough and added matter is shown by underlining):

Page 2, line 9-line 13,

Every exchange increases the likelihood of vessel damage or non-target embolization.

SUMMARY OF THE INVENTION

Thus if a single catheter could achieve the objective of catheterizing both bilateral pelvic visceral arteries, such as the uterine arteries for uterine fibroid embolization, throughout the duration of the procedure it would decrease the length of the procedure and subsequently the overall risk to the patient. . . .
